

## Joint Action on Contribution to the Cancer Inequalities Registry to Monitor National Cancer Control Policies (OriON JA)

OriON JA is a proposed initiative aiming to address cancer prevention and care disparities within the European Union (EU). The initiative is in response to flagship No 9 of Europe's Beating Cancer Plan (EBCP), which aims to establish a Cancer Inequalities Registry to identify trends, disparities, and inequalities in cancer prevention and care between and within European Member States and regions.

The aim of the OriON JA is to make available a mainly qualitative analysis of the national cancer control situation in the European Member States, including the state of play of implementation of the EBCP at national level as well as to make available data and insights on socio-economic inequalities to complement and enhance the analysis for the Cancer Inequalities Registry.

### Target groups

The primary target of the OriON JA are policymakers from the European Member States and their representatives. The secondary target group includes EU organizations, experts, patient advocates, representatives, and patients from across Europe.

Co-funded by  
the European Union

OriON was funded by the EU4H Programme (EU4H-2022-JA-IBA)
